

**The "Bowen"
Waterproof Mining Boot**

The "Bowen" Waterproof Mining Boot

The new Oliver "Bowen" high leg lace up waterproof boots are especially designed and constructed for the mining industry where the combination of hard tough working surfaces and water presents a challenge to worker comfort and safety.

Always stay dry, comfortable and protected.

WHAT MAKES THIS POSSIBLE...

AT's Thermoplastic Urethane (TPU) sole

Features a lightness not normally associated with heavy duty work boots. The AT's sole consists of a lightweight shock absorbing low density PU midsole which cushions the foot on impact to provide unmatched comfort and help reduce foot, leg and lower back fatigue.

SYMPATEX water proof liner

This internal bootie construction utilizes microscopic pores to keep water out whilst allowing perspiration to be wicked away from the foot. This ensures that the foot is kept dry and comfortable over long working periods in wet and damp conditions.

This hi tech fabric has outstanding wearability, breathability and waterproof properties.

New Hi-Impact ALLOY Toe Cap Technology... 40% lighter

NATUREform Type 1 wide fit toe cap meets or exceeds ASTM F2413-05 I/75 C/75.

40% LIGHTER

Hi-Impact ALLOY does not generate sparks...

Non-magnetic properties which results in the least interference in electromagnetic fields. With the highest oxidation resistance, it is ideally suited for risky environments.

45-690
"Bowen" 10"
Waterproof
Mining Boot
 Sizes: 6 - 14,
 7½ - 11½.

45-691
"Bowen" 14" Waterproof Mining Boot
 Sizes: 6 - 14, 7½ - 11½.

Comfort collar

Quick release speed rings

Full grain water resistant leather

SYMPATEX fully lined water proof internal bootie liner

COMFORTcushion Impact Absorption System uses a combination of cellular urethane and PORON

Bevelled heel for excellent slip resistance

Stabilising and support shank

METflex internal flexible metatarsal guard. Improved protection

Latex toe cap liner for added comfort

Protection strip

Lightweight Hi-Impact ALLOY NATUREform Type 1 Toe cap

Toe protection, extends boot life

Long wearing TPU outsole designed to self clear rocks and debris from tread. Excellent abrasion resistance

Shock absorbing Polyurethane midsole

METflex

Unique METflex flexible hi-impact poly internal metatarsal guard
 This provides full protection and enables the foot the freedom to flex and therefore will not effect your walking gait.

PORON

COMFORTcushion Impact Absorption System

Uses a combination of cellular urethane and **PORON** to protect the heel and ball of the foot by providing superior cushioning and shock absorption... this reduces foot, leg and lower back fatigue.

Quality Water Resistant Leather

Oliver has selected first quality leathers, soft yet durable that will retain their shape over the life of the boot. Leather has been tanned to resist moisture penetration, allowing water and other liquids to run off. This together with the SYMPATEX liner creates a fully waterproof mining boot.

AT's ALL TERRAIN TPU soling technology offers the following advantages over other soling materials-

- TPU dual density sole offers a cushioned polyurethane mid sole for greater comfort with a hard wearing TPU outer sole.
- Lightweight sole. Lighter than rubber and ideal for the 12 hour shifts.
- Unique sole cleaning tread pattern to ensure cleats do not retain stones and dirt.
- Hard wearing. Superior abrasion resistance will significantly outlast other soling materials.
- Specially designed for the rough uneven outdoor (underground) working surfaces.
- TPU has longer shelf life. Resistant to effects of Hydrolysis.
- Superior resistance to splitting and cracking.
- TPU resists most oils, acids and chemicals.
- Will not mark floors.
- Excellent slip resistance.
- Fibre shank for added stability.

Upper Design:

- Unique **METflex** flexible hi-impact poly internal metatarsal guard. This enables the foot the freedom to flex and therefore will not effect your walking gait.
- **SYMPATEX** fabric water proof bootie. Keeps water out and allows perspiration to wick away from the foot.
- **COMFORTcushion** Impact Absorption System with **PORON** for all day underfoot comfort.
- All new hi-abrasion poly toe tip protection that wears many times longer when boot toe area gets heavy use.
- Quick release speed rings for easy donning and doffing.
- Padded comfort collar.
- Full bellows tongue.

Leather:

- Water resistant, breathable full grain leather.

Safety Toe Cap:

- New Hi-Impact ALLOY Toe Cap Technology.
- 40% lighter.
- Meets or exceeds ASTM F2413-05 I/75 C/75.
