

THE NEW **ATC65** SERIES

THE NEW AT65 SERIES

COMFORT FROM THE GROUND UP

The new AT65 series mining and caustic boot range combines all the safety features you've come to expect from Oliver with a level of comfort that will exceed expectations. The new dual density PU/Rubber sole technology combines a soft shock absorbing low density PU midsole with a high density hard wearing outsole. A revolutionary toe, heel and sidewall moulding creates a totally integrated **SAFETYcell** that significantly enhances protection and durability without compromising comfort. And the **NANOlite** footbed actually massages your feet as you work.

NANOlite TECHNOLOGY

The Oliver Comfort System now has a unique **NANOlite** footbed* for greater comfort and wellbeing. The gently raised surface of the sole massages your feet as you walk, promoting greater blood flow to help reduce fatigue. Plus, a perforated foam air control layer enhances air circulation, reducing odour.

COMFORT TECHNOLOGY

Oliver's unique **COMFORTcushion** uses a combination of cellular urethane and **PORON** to protect the heel and ball of the foot, providing superior cushioning and shock absorption at the heel. This constant impact absorption helps reduce foot, leg and lower back fatigue.

COMFORT GUARANTEE

Try a pair of correctly fitted Oliver AT65 Boots for 30 days and, if you are not completely satisfied, return them to the specialist dealer you bought them from for exchange or refund. †
